

Luiz Henrique Santana

Principal Software Engineer · Athlone, Co. Westmeath, Ireland

luizhenriquesantana@gmail.com · [GitHub](#) · [LinkedIn](#)

Principal Full-Stack Engineer with 15+ years building scalable backend services and modern SPAs.

Proven track record leading squads, mentoring engineers, and delivering customer-facing digital platforms in cloud-native environments.

Expert in Java/Spring Boot microservices, Angular component architecture, and enterprise security practices.

Skills

Java (JEE, Spring Boot) · REST APIs, SOAP, GraphQL · Angular (v8–v19) · TypeScript, JavaScript, RxJS · AWS, Docker, Kubernetes · Oracle, PostgreSQL, MySQL · Microservices Architecture · CI/CD (GitLab, Jenkins) · TDD, OWASP Security · Squad Leadership & Mentoring

Profile

Principal Full-Stack Engineer and Tech Lead with 15+ years of experience specializing in back-end engineering (Java, Spring Boot, REST APIs, microservices) and front-end development (Angular, TypeScript, RxJS). Skilled at architecting scalable backend services, building modern SPAs with superior UX, and leading cross-functional squads. Proven track record of mentoring engineers, improving system reliability, and delivering customer-facing digital platforms in agile, cloud-native environments.

Experience

Principal Software Engineer

Fidelity Investments, Galway, Ireland | April 2026 – Present

- Architecting and developing Transfer of Assets application (SPS – Stock Plan Services, WI – Workplace Investment platform) handling high-volume financial transactions.
- Building scalable Java/Spring Boot microservices with enterprise-grade reliability and security standards.
- Implementing robust REST APIs for internal and customer-facing workflows.
- Collaborating with cross-functional teams to translate business requirements into technical solutions.

Key Technologies: Java, Spring Boot, GitHub, Jenkins, Azure, Oracle

Principal Software Engineer

Dell Technologies, Dublin, Ireland | December 2021 – March 2026

- Built and enhanced Java/Spring Boot microservices powering backend document workflows, processing high-volume XML-to-PDF operations at scale.
- Architected Spring Boot backend services consuming external APIs (Adobe Echosign) and exposing internal APIs for Angular portal ecosystem.
- Implemented Single Sign-on (SSO) with Spring Security OAuth2 for enterprise security and compliance.

- Led development of modern Angular portals (v8–v19), delivering measurable UX improvements for global customer-facing platforms (100K+ users).
- Designed and optimized component-driven SPAs with secure API integration and cross-browser performance optimization.
- Automated CI/CD deployments with GitLab CI/CD, Docker, and PCF; embedded security scans and code coverage requirements.
- Mentored junior and mid-level engineers in front-end best practices, Angular architecture patterns, and reusable component design.
- Identified and reduced critical vulnerabilities by adopting Snyk for security scanning, reducing critical/high vulns by 60%.

Key Technologies: Java, Spring Boot, Angular, TypeScript, PCF, RabbitMQ, GitLab CI/CD, Docker, Linux, GenAI

Software Engineer

Sidero (for Ericsson), Athlone, Ireland | May 2019 – November 2021

- Delivered Angular-based interfaces and RESTful integrations for telecom network management services serving enterprise customers.
- Enhanced front-end performance and debugging for large-scale, real-time monitoring dashboards (10K+ concurrent users).
- Built automation pipelines with Jenkins, reducing regression issues by 40% and accelerating delivery cycles.
- Collaborated with network engineering teams to translate complex domain requirements into intuitive UIs.

Key Technologies: Java, Spring Boot, Angular, REST APIs, Groovy/Spock, Linux, Jenkins

Senior Programmer Analyst

Stefanini (for Dell Financial Services), Brazil | February 2017 – April 2019

- Developed Angular + Java applications supporting Dell's financial content management and document processing systems.
- Created REST/SOAP integrations for backend services, maintaining system compliance and operational reliability.
- Optimized query performance for high-volume financial data processing.

Key Technologies: Java, Spring Boot, Angular, REST, SOAP, Struts2, JSF2, Oracle, Jenkins

Java Developer & Systems Analyst

Algar Tech, Grupo Meta, Prodabel, PD Case, Brazil | 2008 – 2017

- Designed and developed government and financial web applications with JSF, Struts, RichFaces, and JSP, prioritizing front-end usability and accessibility.
- Delivered reporting modules and UI components for tax collection and public accountability platforms serving thousands of users.
- Contributed to distributed application design and multi-client system integrations across complex enterprise environments.

Education

- **MSc, Software Design with Cloud Native Computing** — Athlone Institute of Technology, 2020–2021
- **Postgraduate Diploma, Cloud Native Computing** — Athlone Institute of Technology, 2019–2020
- **Specialisation, Systems Analysis** — CEFET-MG, Brazil, 2012–2014
- **BSc, Internet Systems** — Centro Universitário de Belo Horizonte, Brazil, 2005–2008
